PROFILE

Dedicated and hardworking individual with good communication, analytical, and teamwork skills seeking an opportunity to contribute effectively to organizational success while enhancing my professional abilities.

ONLINE COURSES AND CERTIFICATION

- Embedded System Architecture and ARM Process: Certified in "Embedded Systems– authorized by LIVEWIRE.
- ADAS ECU Simulation and Testing: Certified in "CANoe Simulation"
  authorized by ANCIT
- ADJP and ADPP certificates by Computer Software College.

PROJECT

SMART HOME AUTOMATION ——————— 02/2025

· Created a Smart Home System with features like Smart Lock , Smart Lighting, and Gas Detection to improve home safety and convenience.Used technologies like Raspberry Pi Pico WH,MicroPython, MQ-2 Sensor, Keypad,

CITYFIX – URBAN MANAGEMENT & ISSUE REPORTING PORTAL

Developing a full-stack web application using the MERN stack to streamline city maintenance. The platform allows citizens to report local issues, which are then tracked and managed through a centralized dashboard.

MongoDB, Express.js, React.js, Node.js, and Vercel.

PYTHON UTILITY REPOSITORY (THONNY CODINGS)

Open Source & Scripting

Maintained a GitHub repository of Python-based automation scripts and utility tools developed in Thonny, focusing on algorithm optimization and hardware interfacing.

SKILLS

PROGRAMMING SKILLS

C | Python | JavaScript

HARDWARE &IOT

Embedded system | Raspberry pi | Pico WH | Drone Tech | Arduino

WEB DEVELOPMENT

HTML | CSS | React | Node.js | MongoDB | Express.js

TOOLS

Git | Github | VS code | Mission Planner | Render | Vercel
